

DIVERSITY AND EQUAL OPPORTUNITY

Diversity is not just a part of our corporate culture - but also a way of life here at SKE. As an international organization, part of our success is attributed to the benefits associated with employing a diverse, international workforce. This has made SKE the workplace that we are today. As an equal opportunity employer, SKE welcomes EVERYONE-- regardless of race, religion, color, gender, sexual orientation, and age. We actively pursue policies which promote equal opportunity, particularly when it comes to employing women, disabled persons, people older than fifty, as well as people with foreign back- grounds. But to us, diversity management is also an instrument for effectively developing individual skills and talents which serve the individual as well as the entire corporate group. In a respectful and appreciative working environment, this is how we increase our ability to compete with other companies internationally and actively shape our own future.
